CEA IN THE KITCHEN PROJECT!

At the beginning of September, after a survey on the needs of the beneficiaries, two extended cooking activities were organized, in the framework of "The Kitchen project", using the CEA tools. It was not the first time for this but it was the first time that two activities took place within two days and feedback was given at the same time. As a consequence, the participation of the beneficiaries was great and the positive feedback reached 90%. In addition, there was another innovation: feedback was taken through photos. For once more, the CEA approach contributed to designing and implementing successful activities as well as to the better response of the HRC to the needs of its beneficiaries!

EXCURSION TO THE LIMNON CAVE

The UAMsS of Kalavryta, always aiming at the smooth social integration and education of its beneficiaries, organized another excursion in the surrounding area. This included a visit to the Cave of Lakes and the modern museum of the facility and a walk on a nearby path to the village of Kalavryta.

All the children entered the cave area, where with the help of the guide and interpreters, they were informed about the environmental life of the cave, the fauna and flora that lives and grows both inside and in the surrounding area.

The young people showed great eagerness to learn exactly how the environment of a cave works, the temperatures that develop and the mechanism of formation of stalagmites and stalactites. They were impressed with the variety of rocks and the different forms they have taken.

The excursion ended with an experiential walk in the forest, where the children were shown everything they had heard theoretically in the museum about the environment of the area, but now in their real-life conditions.
